Bridge Constructor Playground is an RPG, simulation and PC model that was published by Headup Games in 2014. Construction of bridges for trains. Bridge Builder Playground PC 2014 Overview: You will play as an engineer who designs bridges. The players will have a lot of equipment for this. It depends on your creativity in how you decide to create it. (v8.1 including all added DLCs) these bridges should be strong enough to be used as trails. Novice players will get easy projects at the beginning. If you pay a little more attention, it will be very easy to finish the initial levels. You can test projects as much as you want. The test will be successful when the train passes through the track without any problems. There are no negative results in the bride builder's playground. So, players are free to test anything when it is needed. There is no way to build a strong bridge there are hundreds of roads. You just have to find the best way to do it. When the train passes the bridge without any accidents, you will get the total points at this level. When any of the train carriages fall, there will be no maximum scores for you. Remember that there will be no trains just to test the designed bridges. Cars are another type of car that can be used for testing. So, the way you design a bridge should be different from the previous level. When players make mistakes at Bridge Constructor, there will be no problems. These errors can be fixed within some seconds. Although this version of Bridge Constructor has a low volume, it contains good graphics in 3D environments. Features of The Bridge Builder Playground: Try to build the best bridges to get a total of 32 challenging scores in five different environments named city, canyon, beach, mountains, Rolling Hills four building materials named concrete piles, steel, wood and steel cable...
